

Circular Letter No.: 2023.192

Issue Date: 15 December 2023

Application: BEAM Plus NB Version 2.0

Effective Date: 15 December 2023

HWB 11 Daylight

1. The Technical Circular Letter hereby announces an update to the extent of application for **HWB 11 Daylight** under BEAM Plus NB v2.0.
2. The extent of application is initially restricted to residential, office and education buildings.
3. In order to promote the integration of daylight in various projects, it has been decided that to extend the application of HWB 11 to other building types. If the Applicant wishes to achieve the bonus credits for other building type, the Applicant should-
 - (a) Provide a comprehensive narrative explaining why daylight is beneficial in the context of sustainability for the specific building type that is submitted. The narrative should also include the positive impacts of daylight on energy efficiency, occupant well-being, energy conservation etc.
 - (b) Ensure that the submission adheres to the assessment criteria specified in HWB 11 for the specific building type applying for bonus credits.

A handwritten signature in black ink, appearing to read "Ir Colin Chung", is written over a horizontal line.

Ir Colin Chung
