Professional Knowledge Advancement Scheme – The Development and Implementation of Green Building in Hong Kong

Introduction

Professional Knowledge Advancement Scheme will combine the Mainland and Hong Kong green building technologies and standards to foster Hong Kong professionals to understand technology development and standard application. The deliverables are as below:

1. Based on the 《Assessment Standard for Green Building》 (GB/T 50378-2019) & 《Hong Kong Green Building Assessment Technical Guideline (2019)》 and BEAM Plus Assessment family to provide the participant practical training on how to interpret the assessment and to apply in their project.
2. Based on the theme of green building, we will expand the training on related topics, such as green building materials, urban planning, intelligent systems, etc.
3. The training will match different topics based on basic knowledge, practical knowledge, and implementation requirements to help attendees understand green building-related technologies and applications.
4. The concept will enhance Hong Kong professionals' knowledge structure of green building and carbon reduction & carbon Neutrality.
5. Case sharing will help Hong Kong professionals to learn from the experts the issues encountered, viable solutions and project optimisation.

The training will help Hong Kong professionals bridge the gap between engineering technologies and green building strategies.
