

Climate Change Forum

25.5.2024 (Sat)**10:00am – 12:15pm**

The U.N. chief issued a stark warning on climate change this week: "The era of global warming has ended; the era of global boiling has arrived."

Hong Kong has made a commitment to achieve Carbon Neutrality by 2050, and the Government has appointed Commissioner for Climate Change (CCC) to lead the efforts in combating climate change. We are delighted to have the CCC joining us to share the roadmap for achieving Carbon Neutrality in Hong Kong. In addition to the CCC's presentation, we are honored to have three distinguished speakers who will share their insights with us. a dynamic panel discussion will take place, allowing the speakers to engage in a collaborative conversation and further explore the topics at hand. As the co-organisers, BSL and PGBC's representatives Ir C.S. HO and Ar. Dr. Tony IP, *MH* will join the panel discussion with the speakers. The forum will conclude with a Q&A section, providing an opportunity for attendees to further explore the topics discussed.

Synopsis

Hong Kong's Climate Action by Mr. WONG Chuen Fai, *JP*

As the Commissioner for Climate Change, Mr. WONG will talk about Hong Kong's climate strategies and action to tackle the global challenges, from working towards deep decarbonization, carbon neutrality to developing a climate resilient city. Mr. WONG will also highlight the role of professionals in this city-wide agenda.

What are the must-dos on urban development in time of climate emergency? by Dr. Bruce CHONG

Bruce has been an engineer focusing on sustainable infrastructure and urban planning. He will highlight essential elements for carbon-neutral development and climate adaptation, he will also discuss the role of smart city tools in supporting sustainable and climate-resilient design.

Can TOMORROW be A Better Day? by Ar. Edward NG

Edward will delve into issues such as extreme weather and poorly designed buildings, highlighting the importance of sustainable design and resilient architecture in mitigating climate change.

BACK TO THE FUTURE – What would you do differently? by Prof. Khee Poh LAM

Prof. LAM will explore our collective journey in facing climate change, emphasizing the benefits of alternative approaches.

Moderator

Ar. Yvonne IEONG

Chair, HKIA Environment & Sustainable Development Committee
