

# Building Management through ESG & Sustainability

Organised by BEAM Society Limited

## Building Management through ESG, Sustainability and Beyond

ESG reporting and relevant sustainability issues are commonly perceived as more closely related to company governance rather than green building management. Instead of building owners and engineers, listed companies are the parties responsible for ESG reporting with accountants setting up ESG-related reporting standards.

Their roles in building management have nevertheless become more recognised. For example, the standards of BEAM Plus Existing Buildings have been including ESG disclosure requirements, net-zero transition roadmaps and climate risk assessment as green building management assessment criteria. Other green building assessment with criteria on climate risk assessment and other relevant ESG practices are also emerging.

In this presentation, through the history of sustainable building development, the integration of green building management with ESG elements would be discussed. The topic also covers how emerging ESG requirements for companies would be able to support the current and future building sustainability development. Certain tools would be used to demonstrate how ESG development can be performed for existing buildings.

### 1.5 CPD hours for BEAM Pro and BEAM Affiliate

The CPD hours will be automatically uploaded to attendees' BEAM Pro / BEAM Affiliate Individual Account; Certificate of Completion will be issued via email within 1 month after course completion.

- Date:** 20 March 2025 (Thursday)
- Time:** 3:00pm - 4:30pm
- Course Code:** M-2025-0320
- Format:** Webinar
- Language:** English, supplemented with Cantonese if appropriate

### Speaker

**Dr Howard CHEUNG**  
*Assistant Director*  
*Building Energy Analytics Company Limited*

### Supporting Organisations:

### Terms & Condition:

- Registration will be on a first-come-first-served basis.
- BSL reserves the right to cancel, postpone or reschedule an event due to unforeseen circumstances, e.g. insufficient enrolment.
- The course will be cancelled when typhoon signal no. 8 above, or black storm warning is hoisted 3 hours before the course.
