INTRODUCTION

The upcoming seminar aims to unite professionals from the building and construction industry to collaboratively explore strategies for achieving decarbonization and net zero emissions. With buildings accounting for nearly 40% of global carbon emissions, it is crucial for everyone involved—designers, builders, operators, and managers—to come together and share innovative solutions. By fostering dialogue and collaboration, we can collectively pave the way towards a sustainable future, significantly reducing our industry's impact on climate change. Don't miss this opportunity to be part of the change!

Industry leaders in different area of interest are invited as the speakers of the seminar, including ASHRAE Distinguished Lecturer from United State. The seminar program will include presentations that address the following topics:

- GBA Climate Responsive Architecture
- The Advanced Energy Design Guide for Zero Energy Office Buildings
- The Henderson - Pioneering World-Class Sustainability Design in Commercial Building
- AI Solution for Customer Experience Enhancement and Energy Efficiency at Elements

Participants will gain a great opportunity of networking in the physical conference. Various stakeholders in the industry will join together and share the latest updates to ensure you remain at the forefront in the engineering industry.
