Realising the ESG Value of a Future-Proof Smart Green Building — The Henderson from Design Inception to Building Operations

The Henderson is Hong Kong's boldest new architectural and engineering masterpiece — the city's most spectacular commercial development in Central. This new development is setting a benchmark in the Hong Kong building industry for enhanced tenant experience, advanced data-driven building operations, and comprehensive ESG functions via a state-of-the-art Digital Twin.

The notion of "future-proofing" guided the overall design approach. The innovative building aims to provide a new kind of sustainable and smart workplace — one that revolves around employees' health and well-being, environmental aspirations, and smart digital technology. The industry-first ESG Partnership Program demonstrates the commitment to collaborating with tenants, their individual staff members, and the owners of the new development on the ESG journey.

The Henderson has already achieved multiple accreditations and attained the highest ratings in green, healthy, smart building, and sustainable lifestyle categories. The seminar aims to explain the rationale behind the design inception, highlight key design features, and showcase how ESG initiatives are carried forward in daily operations.

BEAM Plus New Buildings Version 1.2 Final Platinum Rating, **LEED** Platinum, **WELL** Platinum, **CGBL** 3-Star, **CHBL** 3-Star, **CSBL** 3-Star Pioneer, **ActiveScore** Platinum, **ModeScore** Platinum, **WiredScore** Platinum, **SmartScore** Platinum
