

Organised by BEAM Society Limited

## Green Energy Application and High Efficiency Energy System

Carbon neutrality is a national policy in which every stakeholder has to achieve. According to carbon footprint statistics, 60% of carbon emissions are from power generations and 20% from transportation. Green renewable fuels are solutions to reduce and even eliminate carbon emissions. In addition, power generation at construction site also contributes substantial emissions. There are new ideas and POC systems to achieve low emissions and this session will share some of the new ideas with audience.

### 2 CPD hours for BEAM Pro and BEAM Affiliate

The CPD hours will be automatically uploaded to attendees' BEAM Pro / BEAM Affiliate Individual Account; Certificate of Completion will be issued via email within 1 month after course completion.

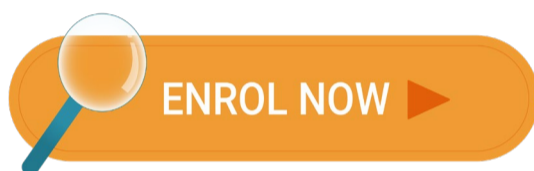

**Date:** 17 Oct 2024 (Thu)

**Time:** 3:00pm – 5:00pm
