

# [Webinar] Leverage Technology to Achieve Data-driven Sustainable Operation

## Introduction

Nowadays, there is an increasing number of building owners deploying different technologies to help achieve their own targets of environmental, social, and corporate governance (ESG) and to fulfil different standard requirements. Nonetheless, having the technology installed does not mean the job has been done already.

Have you ever thought of:

- How to ensure the right solution is picked?
- Is the technology really helping?
- Are the operation team leveraging the technology to help?
- How to evaluate performance of the solution?
- And is there a way to justify the investment?

This session will focus on how to leverage technology, data from digital solutions, and change of behaviour to become a greener and wiser stakeholder.

**CPD Entitlement: 2 CPD hours**

**Language: Cantonese**

[Online  
Registration](#)

**Registration Deadline:**  
**29 November 2022 (Tuesday)**
