

[Webinar] Carbon Neutrality and Real Asset Sustainable Development

Introduction

The Hong Kong Special Administrative Region (HKSAR) has unveiled Hong Kong's Climate Action Plan 2050, which outlines the goal of reaching carbon neutrality by the year 2050.

The speaker will share with the audience how exactly the real estate market could benefit in accomplishing this goal. Some clues will be discussed to showcase how the numerous stakeholders in the real asset business could contribute to the environmental, social and governance challenges, as well as the sustainable development in the many diverse elements of the real asset industry, such as construction, operation, investment and management.

This session will also illustrate how a green building certification scheme, i.e., BEAM Plus, can facilitate green building design in Hong Kong.
