2 CPD hrs
(Mandatory)
for
BEAM Pro

Venue: BEC Auditorium, Jockey Club Environmental Building,
77 Tat Chee Avenue, Kowloon Tong, Hong Kong

Language: English

Fee: HK\$1,000

Upon completion of this course, BEAM Pro will attain an additional professional qualification to carry out BEAM Plus Interiors Projects.

There are about 40 Million m² of office space in Hong Kong, with renovation and fitting out projects representing the bulk of active projects each and every day. Because of their number and repetitive nature these projects have a significant impact on the environment and our quality of life. Responding to market demand and recognising those who choose to do this work in an environmentally friendly fashion and offer users a healthier workspace, a new green building rating tool was created locally by BEAM Society Limited: BEAM Plus Interiors. This new addition to the BEAM Plus green building suite of rating tools covers fitting out works for commercial premises, offices and retail spaces.

This two (2) hour training course is specially designed for BEAM Professionals. It will introduce the new framework, grading, credits and features of the new rating tool. Undertaking this training course is a prerequisite for all BEAM Professionals submitting Interiors projects for assessment and certification using the BEAM Plus Interiors rating tool.
