

Organised by BEAM Society Limited

Technical Visit to HKREP EDU HUB

建築環保評估協會

The new HKREP EDU HUB showcases an innovative sustainable heritage revitalisation project in Hong Kong that reinvigorates the historical space and transforms the existing building into a sustainable centre for theatre education. The proposed centre is a 3-storey Grade II building situated in the heart of the city and hidden by high-rise residential buildings. It has served as an educational place since the 1920s and will be continued in the 21st Century.

The revitalisation of the building is designed to respect the historical context while responding to the current climatic and ecological environment by adopting active and passive sustainable design strategies to minimise energy consumption, carbon emission and waste production throughout the building life cycle. The revitalisation project also addresses ecological conservation by preserving existing ecosystems with enhanced landscapes. It would create a green oasis for visitors and the high-rise neighbourhood around.

The HKREP EDU HUB is designed to re-energise the historic building by promoting the existing value and injecting new environmental values into the building and community by establishing a model of sustainable cultural heritage. This project has received Green Building Award 2021 – Merit Award.

1 CPD hour for BEAM Pro and BEAM Affiliate

The CPD hour will be automatically uploaded to attendees' BEAM Pro / BEAM Affiliate Individual Account; Certificate of Completion will be issued via email within 1 month after course completion.

Date
